

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

bamba, Bolivia; *Capito dayi* (p. 394), Rio Madeira; *Crocomorphus flavus inornata* (p. 395), Santarem, Brazil, and *Formicivora rufa chapmani* (p. 396), Altar do Chao, Brazil.— W. S.

Cory on New South American Birds.¹— Further study of the collections of the several South American expeditions of the Field Museum has brought to light 26 apparently new forms which are described and named by Mr. Cory in the pamphlet before us. They were obtained mainly in Brazil and Peru by Messrs. Osgood, Anderson and Becker but *Pachyrhamphus niger tobagensis* (p. 343) is described from Tobago, *Cistothorus platensis tamæ* (p. 344) from Paramo de Tama, Ven., and *Coryphospingus pileatus brevicaudus* (p. 345) from Margarita Island.— W. S.

Riley on New Ralliformes.²— Mr. Riley describes as new two birds from the collection of the U. S. National Museum; one a Coot from Grenada, *Fulica americana grenadensis* (p. 103), the other a small Rail, *Cresciscus murivagus* (p. 104), from Lima, Peru.— W. S.

Mathews' 'Birds of Australia.'³— The present parts of Mr. Mathews' work conclude the Hawks and the Owls. Much controversial discussion on nomenclature and the recognition of races is presented, and the following new forms are proposed, viz.: (Part III) *Ieracidea berigora tasmanica* (p. 276); *I. b. kempi* and *centralia* (p. 277) and *Spiloglaux novæseelandiæ everardi* (p. 332); as well as a new genus *Berneyornis* (p. 305) for *H. athene strenua* Gould. Part IV contains an elaborate discussion of the Australian and other Barn Owls and *Megastrix tenebricosa perconfusa* (p. 408), British New Guinea, is described as new.— W. S.

Buturlin's Review of the Nuthatches.⁴— In his studies of this family extending over ten years Mr. Buturlin comes to the conclusion that it is not so homogeneous as generally supposed and proceeds to separate it into three subfamilies, *Daphenosittinæ*, comprising *Daphenositta* and *Neositta*; *Cyanosittinæ* comprising *Pæcilositta* gen. nov. (p. 149) for *Dendrophila* Sw. preoccupied and *Cyanositta* gen. nov. (p. 149) type *Dendrophila corallipes* Sharpe; and *Sittinæ*, comprising *Callisitta*, *Arctositta* gen. nov. (p. 151), type *Sitta arctica* But., *Sitta*, *Mesositta* gen. nov. (p. 152), type *S. himalayensis* Jard. & Selby, and *Rupisitta*.
